Humic & Fulvic Acid
The "Missing Link" for Optimum Health

Many scientists throughout the world call Fulvic Acid "the missing link to optimum health. "Because of its wide spectrum of action, it is difficult to say exactly how Fulvic Acid performs its miracles. However, exhaustive scientific studies have proven its power. You will learn how this is the end product of a life of research from a team of scientists who are completely dedicated to saving Mother Earth and all of her life forms.

According to the Water Quality Association, Fulvic Acid is a "water-soluble, natural, organic substance of low molecular weight, often found in surface water." It is one of several subclasses of Humic Acids that arise from complex mixtures of partially decomposed organic materials.

In other words, Humic Acids are biological compounds created by Mother Earth. These composites were originally deposited by pristine, ancient forests and compacted and transformed over millions of years, waiting to be extracted for our use today.

PROPERTIES OF HUMIC AND FULVIC ACIDS
Humic and Fulvic Acids "wear many hats" because they enter into all life processes within all life forms. Humic substances, of which Fulvic Acid is one, are the link between the living and the nonliving in nature. They were orchestrated by Mother Nature to bridge this gap. Furthermore, Humic Acids are able to beneficially influence and guide living organisms in various, unique stages of their life and growth.

When the proper amounts of humic substances are dissolved in water, the water takes on a new form, becoming molecularly restructured. Specifically, Humic Acids cause the water to form pyramid-shaped molecules (tetrahedrons) that have valuable, proven medicinal properties.

Unfortunately, Fulvic Acid is still not well known or understood by most of the scientific and medical community. Chemists have not been able to synthesize it or clearly define it. Why? Because it is the smallest, most complex, most highly refined, naturally occurring, water-soluble substance on Earth!

Tiny amounts of Fulvic Acid remarkably transform the molecular structure of water, making it intensely more active and penetrable. Additionally, it assists water in its job of dissolving and transporting, helping to carry nutrients into the cell and waste products away from it, while also helping to neutralize toxins, invaders, and heavy metals. As a result of these extraordinary properties, it is believed by some that all homeopathic remedies should contain Fulvic Acid in order to enhance their action.

Amazingly enough, scientists have discovered that Fulvic Acid is nothing less than tiny fragments of DNA from past generations of living organisms. In other words, Fulvic Acid is the "milk" from Mother Nature, meant for giving life, energy, health, immunity, and renewal to Earth and all of its life forms.

This "Milk" Could Be One Of The Most Important Discoveries In The History Of Health And Medicine!

THE 21ST-CENTURY NUTRITIONAL CHALLENGE
In this regard, much has been written in recent years about the deterioration of our food supply. There has been intense questioning about how to improve the poor nutrient quality of today’s available foods. USDA studies show a 25-to-80-percent decline in minerals in the food we eat. In 1936, U.S. Senate Document 264 stated, “The alarming fact is that foods, fruits, vegetables, and grains now being raised on millions of acres of land no longer contain necessary levels of essential minerals. These foods are starving us, no matter how much we eat.”

Professor Louis Kervran, France's former Minister of Health and a Member of the New York Academy of Sciences, states:
“The present form of agriculture, to which our biological agriculture is opposed, leads to the ruin of soil and health and will eventually bring about the death of humanity.”

Even when minerals are supplemented, most preparations are only minutely bioavailable. Thus, our bodies cannot properly absorb the minerals.

Humic Acid not only contains all the minerals our bodies need, but, more importantly, the Humic Acids and Fulvic Acids in our mixture enable these minerals to be absorbed by the human body. Technically, these acids consist of “negatively charged metal-complexing ligands,” which act as ion exchangers, releasing metal ions of low atomic mass and chelating heavier metals.

What this means for us is that Humic Acids and Fulvic Acid complexes enhance mineral and trace element uptake, helping us to maintain mineral and trace element balances in our bodies without threat of toxicity. Whenever minerals come in contact with Fulvic Acid in a water medium, they are naturally dissolved into ionic form. These minerals literally become part of the Fulvic Acid itself. Once the minerals meld into the Fulvic Acid complex, they are now bioactive, bioavailable, and organic.

Humic Acids and Fulvic Acid Complexes might very well be the answer to the 21st-Century Nutritional Challenge.

UNIQUE
Humic and Fulvic Acid is in a category of its own. More than 40 years of research in extracting Humic and Fulvic Acids from the richest deposits of organic shale known.

HEALTH BENEFITS
When Humic Acid is consumed by any life form, increased energy is among the first results, followed by a noticeable improvement in morale. Other effects include decreased appetite, deeper, higher-quality sleep, and a lessening of pain and debility from arthritis or physical injuries.

For any life that is in a serious degenerative condition, a healing crisis might occur. The body will go into a state of major cleansing and will use all its “exit doors:” intestines, kidneys, skin, lungs, liver, and, in women, the vagina. In other words, the body will try to rid itself of all of its accumulated toxins and poisons, including heavy metals, parasites, and fungi.

Although often uncomfortable, healing side effects are temporary. Professional practitioners are aware of this phenomenon and can guide you through it.

ANTI-AGING AND IMMUNITY
As we age, many facets of the body's chemical equilibrium become unbalanced. Humic substances produced by our unique nanotechnology help maintain this chemical equilibrium in the body, creating “homeostasis.” Humic & Fulvic Acid is a superior anti-aging and rejuvenation formula.

Fulvic Acid is the finest electrolyte known to man. Its electrolytes are able to restore vitality in all life forms. When our electrolytic potential (aka our “Zeta potential”) fades away, so do our energy and our health. In fact, this loss of electrolyte potential is the main reason why we “age.” However, Fulvic Acid promotes an electrochemical balance because it is both a donor and a receptor of electrons.

Also, Fulvic Acid is useful as an adjunct to other longevity agents and will potentiate their effectiveness. The bottom line is that it helps treat and delay the onset of the symptoms and side effects of aging!

One of the most exciting aspects of Fulvic Acid is the powerful and diverse spectrum of immune system responses it stimulates in the human body. For example, Fulvic Acid:

Two time Nobel Prize winner and renowned scientist, Dr. Linus Pauling, stated to the 74th Congress of the United States back in 1936, "Every ailment, every sickness, and every disease can be traced back to an organic mineral deficiency."

Modern U.S. agricultural practices within the last 75 years have nearly eradicated all naturally occurring Complex Ionic Trace Minerals found in Fulvic Ionic Minerals out of our soil. In doing so, we have eliminated these naturally occurring, indispensable elements from completely out of our diet.
Organic Trace Minerals Are The "Gift Of Life".

Cellular Function Becomes Impossible Without Them!

"Laboratory tests prove that the fruits, the vegetables, the grains, the eggs, and even the milk and meats of today are not what they were just a few generations ago. No man of today can eat enough fruits and vegetables to supply his system with the minerals he requires for perfect health." (quote from the United States Senate Document 264 printed in 1936)
